

FA26 Special Studies Questions

- **Number of units previously received for this project**
- **Prerequisite coursework or knowledge for this project**
- **Nature and frequency of contact (hours per week)** *Specify how you are meeting with your instructor, what activities you are doing, how often, and how long. Total hours listed here should match the hours selected above in "Units".*
- **Means of Evaluation (paper, final, etc.)**
- **Proposed plan**
- **What research question(s) will you address in your independent project? Begin this section with at least one sentence of background information (existing knowledge) that your question(s) build on.**
- **How will you address these questions experimentally? Describe the methodologies, procedures, and tools/techniques you plan to use.**
- **How will the experimental data be analyzed? Include any software or other tools to be used for data analysis not described above, if applicable.**
- **Please attach supporting documentation (e.g. Winter/Spring Research Update for BISP 196, etc.).**
